Programm für lebenslanges Lernen

Energy Consumption

Electricity consumption by different source
(average of 16 German households)

average
consumption per
week:

68,1 kWh

Energy Consumption

Theoretical case study for one household

Energy consumption

Longterm monitoring of gas consumption:

Daily gas consumption vs. air temperature (family 1)

Energy consumption

Longterm monitoring of electricity consumption:

Energy consumption

Daily electricity consumption before and after implementation of energy saving measures family 1

Daily electricity consumption vs. air temperature

Energy consumption

Daily electricity consumption before and after implementation of energy saving measures family 2

Daily electricity consumption vs. air temperatur

Before:

63 kWh
per week

- ◆ Before
- ◆ After

After:

56 kWh
per week

Energy Mix

Electricity production in Germany: Energy Mix

Energy Mix

Germany (mean) and energy supplier Sulingen (EON-Avacon)

(reference: www.eon-avacon-vertrieb.com)

CO2 emission Germany (mean):

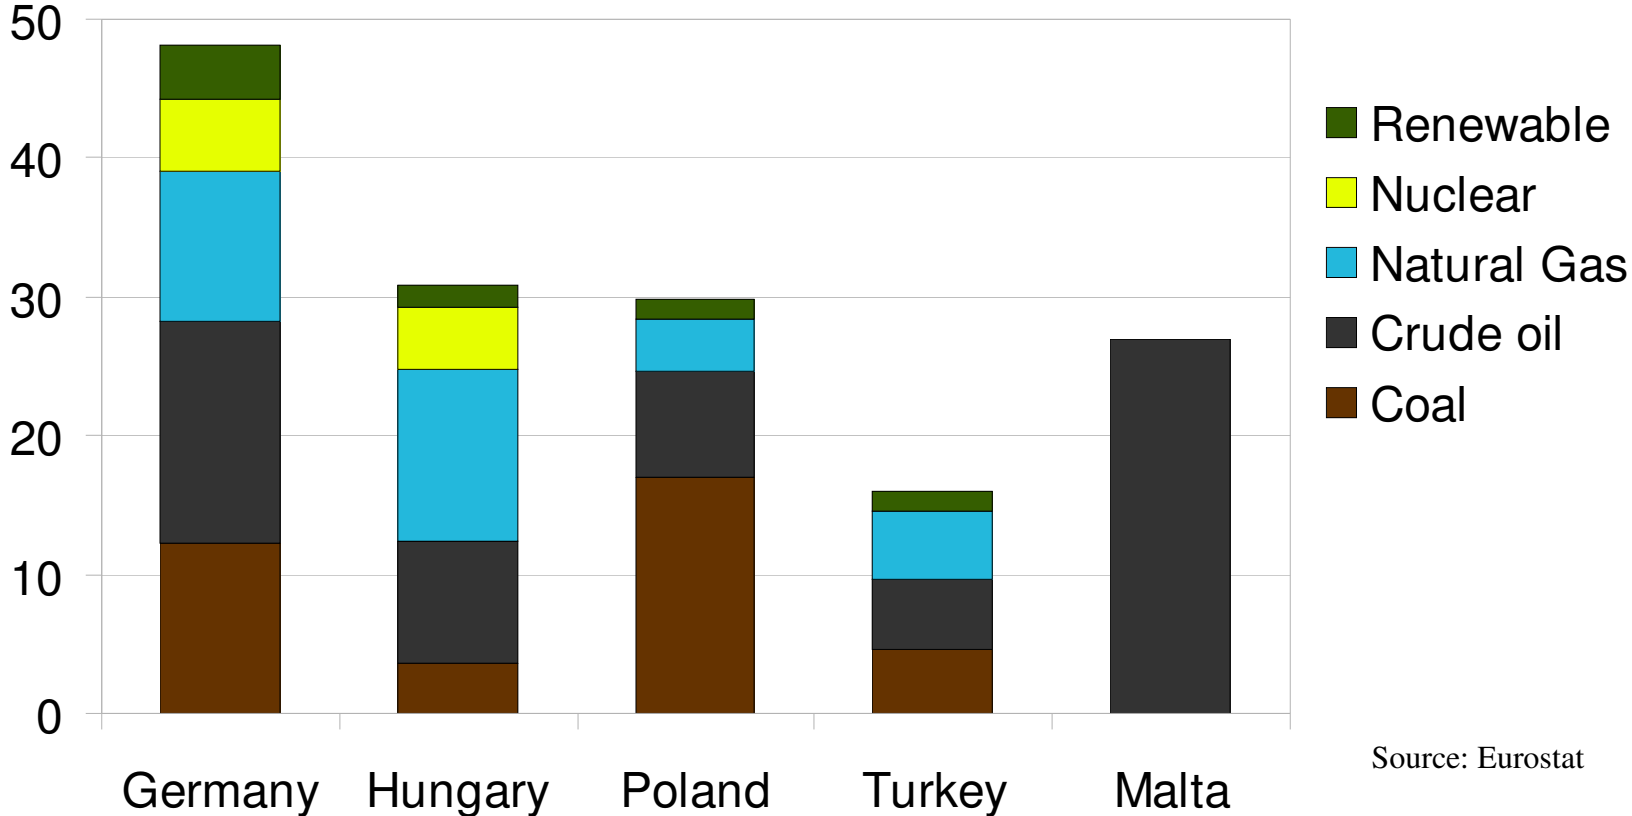

541 g/kWh

Sulingen (region):

386 g/kWh

Energy Mix

gross inland energy consumption in 2007 in MWh per person

Saving Energy

Energy Saving Tips:

- **Unplug:** Even when a charger is not connected to the appliance, it still consumes electricity.
- **Switch off:** Do not leave appliances on standby. Use the „on - off“ function.
- **Only boil as much water as you need:** Avoid boiling water unnecessarily.
- **Use energy-saving-bulbs:** Energy-saving bulbs can reduce your lighting costs and avoid CO₂ emissions.
- **New devices:** More energy efficiency at home reduces energy consumption.
- **Don't use the dryer:** Put the clothes on the clothesline.

Saving Energy

Save energy and reduce CO₂ emission:

PC and Monitor:

stand-by power per day: $10 \text{ W} \cdot 21 \text{ h} = 210 \text{ Wh}$

energy saving per year: **76 kWh**

reduce CO₂ emission per year: **41 kg**

all students in our school: approx. **40 tons**

Energy-saving bulb 11 W/ light bulb 60 W

power difference per day: $49 \text{ W} \cdot 4 \text{ h} = 196 \text{ Wh}$

energy saving per year: **71 kWh**

reduce CO₂ emission per year: **38 kg**

approx. 200 km by car (8 ltr. / 100 km)

→ 40 kg CO₂

Programm für lebenslanges Lernen

Saving Energy

Save energy and reduce CO₂ emission:

Condenser Tumble-Dryer:

efficiency C rated: 4,48 kWh / cycle

4 washes per week: 18 kWh

energy per year: 936 kWh

2 washes per week: 9 kWh

energy saving per year: **468 kWh**

and in addition

efficiency A rated: 1,9 kWh / cycle

2 washes per week: ~ 4 kWh

energy saving per year: **728 kWh**

reduce CO₂ emission per year: **390 kg**
